Arizona Desert Installation

Product: Lexan Call Box
Location: Call boxes are installed on remote rescue beacons in the AZ deserts

Texas State University

Product: E-Phone, Blue Light Tower, Retrofit Kit
Location: Installed campus-wide, in remote areas, and in parking garages

What Our Clients Have to Say About **CASE** Emergency Systems

I cannot say enough about CASE Emergency Systems and our working relationship with them. The simplicity of installation, the automatic daily self-diagnostic reports, the low maintenance, and the company's overall service are outstanding.

—Randal Duke, Emergency Management Coordinator,
University of Texas at Tyler

Since the Call Box has been installed, we have had two medical calls which were critical cases. In the past with no cell coverage folks had to drive out of the canyon. This would add about 30 minutes to the response time. We believe lives were saved due to the Call Box.

— John Gulserian, Program Manager, Nevada County
Office of Emergency Services

Thank you for the phones. They work flawlessly, and the members love them.

— Dave Kardos, Burning Tree Country Club

Thank you everyone, this means a lot to my department as we work toward improving public safety and officer safety. Every person who calls us from a phone box at the bottom foot paths lowers the chance of harming themselves and us getting harmed as we work to help them.

— Staff Sergeant Ryan Hall, Delta Police Department

The Iron County Sheriff's Office is very excited about the addition of these satellite phones in these remote locations. This will help all emergency services in Iron County to rapidly respond to emergencies where there is little or no cell phone coverage.

—Iron County Sheriff, Mark Gower
